Summary

Gospel Darlington is a remote Fullstack web developer, prolific with technologies such as VueJs, Angular, ReactJs, and API development. He takes a huge interest in the development of high-grade and responsive web applications.

Gospel Darlington currently works as a freelancer developing apps and writing tutorials that teach other developers how to integrate software products into their personal projects.

He spends his free time coaching young people on how to be successful in life. His hobbies include inventing new recipes, book writing, songwriting, and singing.

Experience

Freelance Technical Writer

CometChat

Mar 2021 - Present (6 months +)
I integrate chat SDK into web application projects and write technical tutorials for their clients using their services, there by contributing to the overall success of the company.

Web Software Developer

GIT Technology Ltd

Apr 2019 - Mar 2021 (2 years)
I was the software developer for the company. I developed websites and web applications for their clientele. I also managed and maintained their projects and the company's website.

Web Software Developer

White Creativity

Aug 2018 - Apr 2019 (9 months)
I served as an instructor and web developer at the company. I was majorly involved in teaching their students programming and how to build a web app. I also assisted the Senior developer in executing side projects.
